Legal & General Multi Manager Balanced Trust

Class R Income - ISIN: GB00B2Q4RZ35

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited.

OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to provide capital growth by investing in a broad range of asset classes through collective investment schemes.
- The Fund will invest in a wide range of collective investment schemes (including collective investment schemes which are not regulated by the Financial Conduct Authority) that have exposure to shares in companies, bonds (a type of loan which pays interest), gold, property, cash, deposits and money market instruments (such as treasury bills).
- The Fund manager will select collective investment schemes that invest across all countries, currencies and sectors.
- The Fund aims to have exposure of between 40% and 85% of the assets in shares of companies.
- The Fund will typically have balanced exposure between assets the Manager believes will generate income and assets that will grow in value, relative to other funds in the Legal & General Multi-Manager Trust range.
- The bonds the Fund is exposed to may be investment grade (rated as lower risk) or sub-investment grade (rated as higher risk). Investment and sub-investment grade bonds are bonds that have been given a credit rating by a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
- The collective investment schemes the Fund invests in may be actively managed or passively managed (for example, a fund that tracks a particular stock market index) and up to 50% of the Fund may be invested in schemes managed or operated by Legal & General.
- The Fund may also invest directly in money market instruments (such as treasury bills), cash and deposits.
- The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.

RISK AND REWARD PROFILE

Lower risk ← Higher risk
Potentially lower rewards ← Potentially higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 4 because the mix of different asset types in which the Fund invests has a balancing effect on the rate at which the Fund share price moves up and down. This type of fund is generally considered to be higher risk than one investing only in bonds and lower risk than one existing only in company shares.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment and any income you take from it may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- By investing in other funds this fund indirectly holds bonds and property that are traded through agents, brokers or investment banks or directly between buyers and sellers. This makes them less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the fund may not be able to sell its holdings in other funds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depository.
- The fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the fund may fall.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.

- **Unit price spread:** each day there are two prices for this Fund: a higher price you pay to buy units and a lower price you receive when you sell units. The Fund manager calculates these prices. The difference between these prices is called the 'spread'.
 - The spread is separate to the ongoing charges shown in this section.
 - This Fund's spread reflects the difference between the buying and selling prices of the assets it holds and costs associated with buying and selling the assets. The spread can change at any time and by any amount. As an example, the buying price for units in this Fund was 0.44% higher than the selling price at 31 December 2018.
