

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Legal & General Mixed Investment 40-85% Fund Class D Income - ISIN: GB00BMHTPS64

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited.

### OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to provide a combination of growth and income.
  - The Fund is actively managed and will have exposure to shares in companies, bonds (both corporate and government), money market instruments (such as treasury bills), cash, deposits and indirectly to property and alternative asset classes (such as commodities).
  - The Fund will have exposure of between 40% and 85% to shares in companies. The remaining portfolio will have a higher exposure to bonds than to the other asset classes. The shares in companies may represent all economic sectors and geographical areas.
  - To obtain the exposure to shares in companies, bonds, cash and money market instruments, the Manager may invest directly or indirectly in collective investments schemes (both active and index tracking) including those which are managed or operated by the Manager or an associate of the Manager.
  - At times the Fund could hold:
    - up to 100% in other funds; or
    - up to 100% directly in the assets.
  - The bonds that the Fund invests in may be:
    - investment grade (rated as lower risk); or
    - sub-investment grade (rated as higher risk).
  - Investment and sub-investment grade bonds are bonds that have been given a credit rating by a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
  - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
    - reduce risk or cost; or
    - generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**
- The Fund is actively managed as the Manager uses their expertise to select investments to achieve the Fund's objectives.
  - There is no benchmark available for this Fund as it invests in a broad range of different asset classes.
  - Your units will be income units. Income from the Fund's investments will be paid out to you every six months (as a dividend). This will reduce your capital growth accordingly.
  - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 3.00pm. This is the time we calculate unit prices for this Fund. If you contact us after 3.00pm, the units will be bought or sold at the next business day's price.
  - The Fund's base currency is denominated in sterling (British pounds).
  - This Fund is designed for investors looking for a combination of growth and income through exposure to a diverse portfolio of investments.
  - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
  - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
  - If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

### RISK AND REWARD PROFILE

Lower risk ← Higher risk  
Potentially lower rewards ← Potentially higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 4 because the mix of different asset types in which the Fund invests has a balancing effect on the rate at which the Fund share price moves up and down. This type of fund is generally considered to be higher risk than one investing only in bonds and lower risk than one existing only in company shares.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment and any income you take from it may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the Prospectus available at [www.legalandgeneral.com/reports](http://www.legalandgeneral.com/reports).

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of your Fund may fall.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- By investing in other funds this fund indirectly holds bonds that are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the fund may not be able to sell its holdings in other funds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
- The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.

## CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%*
Exit charge	0.00%*
This is the maximum that might be taken out of your money before it is invested.	
*The Fund also incurs a dilution levy. See opposite.	
Charges taken from the fund over a year	
Ongoing charge	0.96%
Charges taken from the fund under certain specific conditions	
Performance fee	None

- There are no entry or exit charges.
  - The ongoing charges figure is based on the latest available expenses at December 2018. This figure may change in the future.
  - This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
  - The ongoing charges are taken from the income of the Fund.
- Other costs:**
- **Dilution levy:** Each day the Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, if necessary to protect ongoing investors, we can also take a deduction from anyone buying or selling units. This deduction is called the 'dilution levy' and reflects the difference between the buying and selling prices of the assets in the Fund and costs associated with buying and selling the assets.
  - The dilution levy is separate to the ongoing charges shown in this section.
  - As an example, the dilution levy for this Fund was 0.26% for purchases and 0.16% for sales at 31 December 2018. The amount of the dilution levy may differ in future.
  - For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at [legalandgeneral.com/chargesandfees](http://legalandgeneral.com/chargesandfees).

## PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested. The figures do not take account of any bid-offer spread or dilution levy or any transaction costs.
- The performance has been calculated in Sterling (British Pounds).
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 1996.
- This unit class launched in 2014.
