Legal & General Multi-Index 5 Fund

Class R Income - ISIN: GB00BYXQ3K32

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited.

OBJECTIVES AND INVESTMENT POLICY

- The Fund's objective is to provide a combination of growth and income and to keep the Fund within a pre-determined risk profile. The Fund's potential gains and losses are likely to be limited by the objective to stay within its particular risk profile.
 - The Fund is part of a range of risk profiled funds. The target risk profile for the Fund is set by an independent agency*, and is based on the historic return and volatility of different asset types. The risk profile ranges from 1-10 with 1 being the least risky, and 10 being the most. This Fund aims to stay within risk profile 5. We use our experience and research, together with research and allocation guidelines from this independent agency* to restrict the types of assets held and the allocation of each asset type to stay within the target risk profile.
 - The Fund will have exposure to company and government bonds (a type of loan that pays interest), shares in companies, money market instruments (a form of loan that pays interest and is designed to have a stable value), deposits, cash and indirectly to alternative asset classes (such as commodities) and property. The Fund will typically have higher exposure to shares in companies than to bonds, money market instruments and cash relative to other funds with a lower risk profile in the Legal & General Multi-Index Funds range, however, the aggregate exposure to bonds may still be material.
 - The bonds the Fund is exposed to may be investment grade (rated as lower risk) or sub-investment grade (rated as higher risk). Investment and sub-investment grade bonds are bonds that have been given a credit rating by a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
 - In order to achieve this exposure, at least 75% of the Fund will be invested in collective investment scheme. At least 50% of the Fund will be invested in index-tracker schemes which are operated by Legal & General.
 - The Fund may also invest directly in shares in companies, bonds (both government and non-government), money market instruments (such as treasury bills), cash and deposits.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**
- The Fund is actively managed as the Manager uses their expertise to pick investments to achieve the Fund's objective.
 - There is no benchmark available for this Fund as it is constrained by its objective to remain within its risk profile.
 - Your units will be income units. Income from the Fund's investments will be paid out to you every six months (as a dividend). This will reduce your capital growth accordingly.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 3.00pm. This is the time we calculate unit prices for this Fund. If you contact us after 3.00pm, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in sterling (British pounds).
 - This Fund is primarily designed for investors:
 - who have received advice and had their attitude to risk assessed and matched to the risk profile of this Fund but may be appropriate for those investors who have considered the risk profile of this Fund with the others in the Multi-Index range;
 - who are looking for growth and income from an investment in bonds, shares in companies, money market instruments, deposits, cash and indirectly to alternative asset classes (such as commodities) and property.
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
 - To help you understand this Fund, its risk profile and how it compares to others in the range we have created a guide www.legalandgeneral.com/mi-guide.
 - We recommend you read our guide to the Fund range to help you decide if this is the right fund for you.

RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 4 because the mix of different asset types in which the Fund invests has a balancing effect on the rate at which the Fund share price moves up and down. This type of fund is generally considered to be higher risk than one investing only in bonds and lower risk than one existing only in company shares.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment and any income you take from it may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- By investing in other funds this fund indirectly holds bonds and property that are traded through agents, brokers or investment banks or directly between buyers and sellers. This makes them less easy to buy and sell than investments traded on an exchange. In exceptional circumstances the fund may not be able to sell its holdings in other funds and may defer withdrawals, or suspend dealing. The Directors can only delay paying out if it is in the interests of all investors and with the permission of the Fund depositary.
- The fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the fund may fall.
- Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- * **The Fund targets risk profile 5 as calculated by Distribution Technology ('DT'). They are an independent agency who provide risk profiling tools to advisers and fund managers. The Risk and Reward profile scale above is calculated differently to the DT Risk Profiles. The DT profiles range from 1 to 10 with 10 being the highest (rather than a scale of 1 to 7 for the Risk and Reward profile).**

- Other costs:**
- **Unit price spread:** each day there are two prices for this Fund: a higher price you pay to buy units and a lower price you receive when you sell units. The Fund manager calculates these prices. The difference between these prices is called the 'spread'.
 - The spread is separate to the ongoing charges shown in this section.
 - This Fund's spread reflects the difference between the buying and selling prices of the assets it holds and costs associated with buying and selling the assets. The spread can change at any time and by any amount. As an example, the buying price for units in this Fund was 0.61% higher than the selling price at 31 December 2018.
